## WORKFORCE DEVELOPMENT ACTIVITIES

### Founder and Chair of COACH

COACH is a grass-roots organization formed to assist women scientists and engineers in achieving success in their research and leadership in the scientific enterprise. As Founder and Chair of COACH, Richmond has led the organization since 1997 and has been integrally involved in the design and implementation of its many programs including research to understand the issues that women face in pursuing science and engineering careers. The most visible programs are the professional skills and leadership workshops (see list below) for scientists and engineers. Initially developed for women faculty, they have since grown to include workshops for male, female and minority graduate students, postdocs, faculty and administrators. Over 20,000 scientists and engineers have participated in these workshops at over 60 colleges and universities, and at professional meetings including the American Chemical Society (ACS), American Physical Society (APS), the Society for Industrial and Applied Mathematics (SIAM), National Organization of Professional Black Chemists and Chemical Engineers (NOBCCHE), Society for the Advancement of Native Americans and Chicanos (SACNAS), American Geophysical Union (AGU), International Combustion Institute Meeting, the Environmental Mutagen Society (EMS), the American Society for Microbiology (ASM) and Council on Chemical Research (CCR). For a full description, see <http://coach.uoregon.edu>.

Since 2012 the COACH activities have expanded internationally with a particularly focus on working with scientists in developing countries and countries with emerging scientific enterprises. Countries where Richmond has given COACH talks, career development workshops and research collaborative workshops have been held include

Cameroon, Gabon, Algeria, Tunisia, Morocco, Rwanda, Ghana, Kenya, Ethiopia, Tanzania, Mozambique, Namibia, Madagascar, Mauritius, South Korea, Vietnam, Thailand, Indonesia, Oman, Chile, Argentina, Jamaica, India, Sri Lanka, China and Japan. Workshop titles for many of the professional skills building workshops held domestically and internationally are given below.
